PORTER HOSPITAL

Budget and Financial Information

This graph shows the actual total amount the hospital earned as a surplus compared to what it planned to earn. 2009 does not have actual results yet.

This graph shows the hospital's share of the total amount of revenues collected by all Vermont hospitals in 2008.

This graph shows who paid for hospital services by the different payer types (Medicare, Medicaid, commercial insurers, self payers).

This graph shows the hospital's share of all hospital admissions in Vermont in 2008.

PORTER HOSPITAL

Cost Shift

A hospital incurs costs to provide services to their patients. All patients, regardless of their ability to pay, are billed the same price for the same service. Sometimes the payment received by the hospital is less than cost for the services provided. This includes payments from uninsured, Medicare, and Medicaid patients. When the payment doesn't cover the cost to provide those services, this unreimbursed cost is passed on to other payers; this is the "cost shift". The ability to cost shift helps the hospital maintain its financial health.

**Costs Shifted by Payer Type
Actual 2008**

This graph shows the costs shifted by Medicare, Medicaid, and Uncompensated Care to other payers. The top line shows the total cost shift, which is the sum of the costs shifted to others who pay.

**Amount Collected for Each \$1 of Expense and Surplus
Actual 2008**

This graph shows amount of money collected for each dollar of expense and surplus. If a payer (Commercial, Medicare, or Medicaid) is above \$1.00, then it pays more on average than the costs of its patients. If a payer is below \$1.00, then it pays less on average than the costs of its patients.

¹ 2006 benchmarks are 50th percentile data from "The Sourcebook: The Comparative Performance of U.S. Hospitals", published by Solucient, LLC, and are all national groupings except for New England.

² 2008 stand-alone hospital medians from Standard and Poor's, the bond rating agency. The bond rating is one indicator of how likely it is that a hospital would be able to borrow money.

³ Rural Not-For-Profit. The grouping includes rural not-for-profit hospitals in the U.S. having a number of beds between the number shown.

⁴ The calculation of current ratio includes funded depreciation, which is not included in the national benchmarks shown.
